It being Sunday, the President had requested the local committee here not to arrange any programme for the day, His wishes were respected, and the military parade and official exercises were postponed until tomorrow. The President and Mrs. McKinley and the members of the Cabinet attended the Stanton Street Methodist Church in the morning, and in the afternoon some of the party went out for a drive. After dark tonight, the Mexican band w'ich had been brought from the City of Mexico by Gen. Hernandex, serenaded the President and Mrs. McKinley at the train. No horns or drums were Chief Magistrate Met at El Paso By President Diaz's Envoy-Mrs. LL PASO (Tex.) May 5.-To Gen. H. G. Otis, Editor the train. No horns or drums were used, and the soft languorous Spanish airs, strummed on guitars and mando-lins in the cool of the evening, were thoroughly enjoyed. L The Times, Los Angeles, Cal.—Secretary Cortelyou says I can say to Gen. Otis for the President that

Mrs. McKinley's health is improving, rather than LIVELY DAY IN JUAREZ. While it was a comparatively quied day in El Paso, notwithstanding the day in El Paso, notwithstanding the large number of strangers in town, it was otherwise in the Mexican city of Juarez, just across the Rio Grande. May 5 is the anniversary of the defeat of the French invaders at Pueblo, and is celebrated as the Fourth of July is in the United Stater. The Mexicans reached El Paso, the gateway to Mexico, at 9 o'clock this morning, and will remain here until noon tomor-

in the United Stater. The Mexicans are not puritanical in their observance of the Sabbath. Indeed, Sunday is always a fete day with them.

Today the great feature of the celebration was a Spanish buildight. A famous matador had come to Juares from the City of Mexico for the occasion. None of the members of the President's immediate party attended, but buildighting is the national sport in Mexico, as in Spain, and Gen. Hernandez and the Governor of Chihushua occupied a box overlooking the ring. The fight proved to be more than usually bloody and brutal. The net casualties were four buils dispatched, one borse killed, two picadors unhorsed and one toreador severely, but not fatally wounded, as he was helped over the fence surrounding the arena by a maddened buil.

Music Mingles with the Bussing of a Train Making Almost a Mile a Minute-Gov. Nash Met by Maj. Arne at Kansas City.

[BY THE NEW ASSOCIATED PRESS-P.M.] KANSAS CITY (Mo.) May 5.—The Ohio special bearing Gov. Nash and staff and about one hundred citizens of staff and about one hundred citizens of Ohio to San Francisco for the launching of the battleship Ohio, May 18, passed through Kansas City soon after noon today. Religious services were held on board the train at 11 o'clock, conducted by Rev. George W. Collier, who was chaplain of the Thirty-fourth Ohio Regiment during the Civil War, and in the same brigade with the President.

Dr. Collier read the Thirty-fourth Psalm, and based his discourse on it. As there were many good singers in the party, the music was quite a fea-ture, mingling with the busz of the train, which was making almost a mile a minute. Nearly all on the train had been called into one of the larger had been called into one of the large cars for the services, and, although

Of course, the powers must not demand an indemnity which China will be physically unable to raise. It is not certain that, finally, come nation may not demand territory of China in lieu of a money indemnity. It is perfectly certain that if any nation does make this demand, the partition of China will follow, and this will inevitably cause much dissension between the powers. These difficulties and disputes would be long in the settling, and would lead to terrible confusion in China.

"Russia has so far mitigated her demands that there is now not much danger of serious difficulty between her and Japan. Personally, I am very much in favor of the continued existence of China as an empire, governed by her own Emperor. It will save us and all the rest of the world lots of trouble if the integrity of the empire is maintained.

"As far as the punishment of Chinece officials goes, China has already done all that she could. Something out of the ordinary had to be demanded by the powers, for it takes a good deal of punishment to impress the people, and this was no ordinary offense. In some cases, the officials whose punishment was demanded was more powerful than the government, and then, of course, the punishment could not be enforced. BOSTON May 6.—The executive officers of the American board have received from Rev. Dr. Arthur Smith, now in Peking, a statement defensive of the missionaries against criticism in this country. The board regards him as an authority of the first rank on all Chinese affairs. He says, among other things, after referring to alleged misrepresentations of the affair in this country:

misrepresentations of the siege, Dr. Ament found himself with several hundred Chinese Christians on his hands, houseless, moneyless and absolutely dependent upon their foreign pastor. With the permission of the Russian military authorities and with the aid of the United States legation. Mr. Ament took possession of a Mongol house aear the former mission premises, and as it was the headquarters for the Boxers who destroyed those premises, it was judged right and proper by all the authority then existing that the contents of this house should be regarded as confiscated and should be sold for the benefit of the Christians, which was done. This is the basis of the oft-repeated charge of missionary looting, and it is a total misuse of terms."

REFORMERS AT WORK.

Patronage Appointments in the Indian Service Not Satisfactory-Civil-service People Suggest Promotions.

BY THE NEW ASSOCIATED PRESS-P.M. NEW YORK, May 5.—A report by the Investigating Committee of the National Civil Service Reform League on conditions in the Indian service with particular reference to the ap-pointment of agentsh under the pre-ent administration, has been presented to the council of the league. The facts to the council of the league. The facts and recommendations contained in the report have also been submitted to the President. The report says, in part: "Under the system of patronage appointments, these wards of the nation have in many cases been despoiled by fraudulent contracts whereby the agents have obtained large sums of money in violation of the law, while the morals of the Indians have been corrupted by the example of caretakers who are often drunken, brutal, licentious and dishonest."

A number of instances are cited showing how agents have abused their

power for their own pecuniary benefit, and with demoralizing consequences
to the Indians. The report says it
seems evident that whatever temporary improvement may be made by
changes in the personnel of the Indian
service, no lasting reform can be inaugurated without a change in the system itself.

It is submitted that under section 1753
of the revized statutes, the Chief Exexcutive has the right to promulgate
regulations declaring that all appointments of Indian agents hereafter shall
be made by promotion from the superintendents of Indian schools and
from the other higher grades on the
classified Indian service and by details from the army. In pursuance of
this statute, an inspector might be selected by the President from the classified service to ascertain and report
the relative qualifications of the different persons among those eligible for
appointment.

Scandalous Attack by Portrait Painter Herkomer on Miss Wackerman's Reputation Resented by American Colony (BY DIRECT WIRE TO THE TIMES.)

INV DIRECT WIRE TO THE TIMES.]

LONDON, May 5.—(Exclusive Dispatch.) London art circles are in a ferment over the scandalous attack on the reputation of beautiful Miss Vanderbilt Wackerman, the New York heiress, by Hubert Herkomer, England's foremost portrait painter. Miss Wackerman is pronounced by English artists the most beautiful woman in the world, and the lovellest amateum model who ever sat for a painter.

Ambassador Choate has interfered in her behalf, and written to Sir Edward Poynter, president of the Royal Academy, suggesting that the omission of her name from the portrait exhibited by Herkomer in the academy is a grave injustice to the American girl. The American colony is united in demanding justice be done. It is declared that the girl was thrust from Herkomer's mansion, where she was a guest, for no other cause than the artiguest, for no other cause than the art ist's imagination.

score of 126. McCartney did most of the work for the Sacramentos, with ball, getting seven wickets for 71. Croll gave several chances which were not accepted, and the Sacramentos' poor fielding practically lost them the game. Elliott made 31 and was perfectly well set when he was caught by Bird off a hit to deep square leg. The Sacramen-tos followed on, and in their second linning netted 65. The Alamedas won by an inning and 15.

That the woman of abbreviated stature inevitably takes to big plaids which serve to dwarf her dwarfishness?

That the young man who is frightened to death in female society is usually the first to commit matrimony?

That the dog with the least musical voice is the dog that insists upon barking upon all possible occasions?

That the girl who declares she wouldn't marry the best man that ever aved engerly snaps at the first offer?

That it is our own darling sins that in others arouse our severest condemnation?

That we send our severest condemnation?

That we send our children to bed when they are not sleepy and make them leave it when they are?

That it is when we are in a hurry to get somewhere that everybody on the sidewalk takes, particular pains to run into us to impede our progress?

That the average mother finds that all the bad traits in her children were inherited from the man whom she married, because he more nearly approached her ideal than any other man on the footstool?

That a man discovers after marriage that his birdle is a silly goose?

SUMMARY.

BASEBALL AVERAGES It is interesting to note that, although the local nine both outhit and out-fielded the 'Friscos in the series 'ast closed, yet the visitors managed to take away three of the four games. This is where the element of luck en-ters into the national pastime, as well as other things which do not appear in cold figures. The Looloos hit for a team average of .223 in the four games, while the boys from the north only smashed .195. In total bases the local team fell behind by two sacks. The averages for the series are as follows:

The Looloos maintained their superiority in the field, with .930 against .913. The local men had a total of 173 chances during the series, of which they accepted 160 and made 13 errors. The 'Friscos had 168 chances, of which 152 were accepted and 16 errors made.

THE LOSING STREAK.

FALL DOWN OF THE LOOLOOS.

A glance at the work of the Los Angeles baseball team during the last four games—since the return from the northern trip—leads one to the forced execusion that there is a screw loose mewhere, perhaps there are several omewhere, perhaps there are several revews. It is a matter of fact that the ine has been greatly weakened by an injuries to Hutchinson and Brock-off, yet at the same time the balance of the team has not been playing the all it is capable of. There is a lack of glonger, a want of the get-there-one of the season. Just what is wrong is and to determine.

hard to determine.

Losing game after game in which they both outbat and outfield the opposing team cannot be laid to the hard-luck source. That is all right occasionally, but will not hold good always. Perhaps a little more liberal use of brains would not hurt things. A little more team work, a little less of individual play would perhaps better matters. A little jacking-up of a few of the men who show a disposition to shirk their work would possibly be a move in the right direction. In several events there are those seconds faster than those listed with them, but it will be found that the men in charge have been very careful in this matter and that they have had good reasons for their placing.

In the programme is included a running race for the aides and marshals of the Fiesta parade. It will probably be at one-quarter, as it is not thought a longer distance could be well negotiated. Probably the feature of the entire programme is the "Alfalfa"

tion. It must be said that this disposition arises from carelessness and not from intention on the part of any member of the nine.

The work of the boys generally has been above par. The loss of three games in succession after a hard trip and with two of the best men off is not a record to be condemned. They can lose twice that number and still have the hearty support of all the fans. The Looloos have played fine ball from the beginning of the season, and just because a few games are lost they are not to be jumped upon. The proper thing is to get together and find out just where the fault is and and where the remedy lies, and apply it.

The Looloos as a team have demonstrated the season and the proper the remedy lies, and apply it.

The Looloos as a team have demonstrated that it can play ball as it should be played. Individually they are a fine class of players of a character beyond reproach. They have given the city the best baseball it has ever had, and their efforts have been appreciated. When the next game is played on Thursday a much-needed rest will have brought about both Brockhoff and Capt. Hutchinson, and there will be a different story to tell next week. The rooters are with you, boys. Keep at 'em':

of entries are so large as to insure good racing.
The track has been put in the finest sort of shape and unless it rain, before Friday, the course should be fast. A band will be in attendance at the meet and the privilege of the grand stand will be granted free to all with the sole exception of the boxes, which are sold to members of the club only. These will be on sale this morning at No. 310 West Second street. A. H. The programme of races comprises seven events. Among the entries to these will be found some of the finest and fasiest horsefiesh in California. A number of them can show a mile under 2:10, and all of them are fast. There are an unusually large number in better condition than has happened at previous meets, their owners having spared no pains to round them to. And then there are others who have had nothing but the lightest road work.

From a close study of the programme and a knowledge of the different entries and just what they have been doing, the classifying seems to be of the best. In several events there are horses seconds faster than those listed with them, but it will be found that the men in charge have been very careful in this matter and that they have had good reasons for their placing.

He carried off the championship medal with the very fair score of 210, but he was closely pressed by both Leighton and Frick. Belknap was in bad form in the match, although in practice before the medal shoot began, he made large scores. There was a rather brisk wind prevailing, and the range was rather hird to negotiate. of Good Talent and Results in Many Hotly-contested Events at the Blue rock Traps-Other Shoots.

All the honors in the eleventh semiannual tournament of the Los Angeles Jun Club, which closed yesterday, went to J. E. Vaughn of Santa Ana. The vents throughout the two days' shoo were closely contested, however, and if Mr. Vaughn held high gun, Mess:s, Liangerman, Matfit!d and Variel were close behind, Mr. Hangerman, es-pecially, making a fine showing in the ifty-bird races.
The events taken by Mr. Vaughn

The events taken by Mr. Vaughn were the individual championship, carrying a diamond medal; the Tufts-Lyon challenge medal, and high average for the two days' shoot. He also divides the ownership of the E. C. cup with Mr. Haagerman. The individual wag won by 46 birds, and the last race netted 47 for the winner.

The day was an ideal one for work at the traps, and bosides the participating guns, there were many spectators on the grounds. The wind was not so strong as to carry the birds, and most of the work was at medium range. Some disadvantage resulted at times from the failure of the traptenders to change the angles, but after remonstrance on the part of several of the guns who conceived themselves at a disadvantage on straightaway birus, the service on the bluerocks was all that could be desired.

The five-men team champlenship was a peculiarly close event, resulting points apart. Mesers. Matfield, Van Valkenburg, Haagerman, Alexander and Bruner, 99; Mesers. Smith, Monaghan, Briggs, Burke and Vaughan, 98; Mesers. Wrisley, Gilbert Ludlow, Variel and Variel, Jr., 96. For a time the last-named team seemed easy winners, but a few low birds to Variel, Sr., and a little stage fright on the part of Mr. Wrisley lost them the event. It was in this that Mr. Wrisley did his poorest work of the day. In the shoot-off for the birds, Mr. Orr secured most of the responsibility.

to the railway companies of \$17,155,000; that city ordinances have been passed and accepted covering 227 miles more, to cost \$9,585,000, and that ordinances have been prepared for 200 miles more, for which the work is to cost \$11,258,000. These figures aggregate 745 miles of track, representing an outlay of \$33,371,000, with the work even then not wholly completed. To the people of Chicago this means the removal of 719 grade crossings, with their attendant delays and dangers. To the railways it means an outlay of nearly forty million dollars, unforeseen when the roads were built under city charters.

the Pacific Mail liner, "Korea," and it will ply between San Francisco and Hong Kong. Its length is 572 feet, its depth of hold is equal to the height of a four-story building and its beam is 65 feet. Its displacement, on a draught of 27 feet, is 18,000 tons. Its cost will be \$2,000,000. A further idea of the size of this large ship can be gained from the fact that the distance around its rail is about a quarter of a mile. Under present conditions the launching of such a vessel in tha United States is a rare event, deemed worthy of particular notice. When once a shipping subsidy law has been passed and its operation gives encouragement to capitalists to engage in ocean traffic with American-built ships salling under the American fing and manned by American crews, the launching of big merchant ships will become as common and attract as little attention as turning out of locomotives and rail-road cars.

ENGLAND FALLS BACK.
We print below the comparative tatement of the traffic through the Suez Canal for the years 1899 and 1900 says the Journal of Commerce, for-warded by James Burness & Sons, Lon-don. While the total chows no ap-preciable changes, if we examine the table in detail, a considerable shrinkage will be noticed in British tonnage, with a corresponding increase in German tonnage. France and Russia also show notable gairs. As all of these nations were active participants in the Chinese troubles, some of the fluctuations may be attributed to transport service and spplies. How the curtailment of trade spplies. How the curtailment of trade may have affected the decrease is prob-lematical, but it is a more than reason-able assumption to credit Great Brit-

ain's losses to this account:

GREAT GROWTH.

SAN FRANCISCO COMMERCE. The extraordinary growth of ocean commerce of San Francisco, and the increase of the fleet of steamships en-gaged in the foreign trade, are notice-able to every observer of the San Francisco water front, says the San Fran-cisco Chronicle. The docks are con-stantly filled with big steamships recisco Chronicie. The docks are constantly filled with big steamships receiving or discharging cargoes. Some of these vessels are too long for the slips in which they lie, and their hulls project far into the fairway beyond the ends of the piers. It is only a few years since many of these docks were constructed, and they were then supposed to be large enough to accommodate the biggest steamships that would be likely to arrive at this port for twenty years to come. This is all changed now. Piers and docks must be lengthened to hdapt them for the big liners which are making San Franches their home port. Shortly we shall see vessels at our wharves which will make the old Pacific Mail liners of twenty years ago look like cockleshells alongside them. Scarcely a day passes now but what a fleet of large steamships lie in the stream waiting for vacant berths at which they may discharge the cargoes they bring from across the Pacific, or from the islands of southern seas or the ports of Central and South America, with which we are developing a large and valuable commerce. The wharves at which these merchantmen are moored tell the story of our new foreign relations, and the vast and varied resources of the State itself. These are scenes of great activity, and the commercial wealth of a score of its which is being handled on them.

A site of about 200 acres has been purchased in South Louisville, Ky., near Highland Park, by the Louisville & Nashville, where it is said the repair, car and paint shops of the company will be concentrated. The improvements will cost about \$90,000.
At St. Paul, Minn, the Great Northern is contemplating the erection of an office building to occupy the entire block facing north on Third street, between Rosabel and Broadway in this city. The building will cost about \$150,000 and will be three and possibly five stories in height.

At Dallas, Tex., plans have been pre-

\$150,000 and will be three and possibly five stories in height.

At Dallas, Tex., plans have been prepared by O. H. Lang for a \$25,000 two. story brick and stone passenger station, 130x36, for the Texas and Pacific, to be erected on the site of the old station at Lamar street in this city. It will have steam heat, tile roof, electric light, and bids will be taken from April 20 to April 30,

At San Francisco, Cal., plans have been prepared for a two-story brick and iron passenger station to be erected on East Commerce street, for the Southern Pacific. The first cost of the structure will be \$35,000, which with later improvements, will amount to \$85,000, and will have trainsheds for the accommodation of four passenger trains at one time.

The net earnings of the American Car and Foundry Company for the three months ending February 28, are given as \$918,798, as compared to \$544,485 for the quarter ending on November 30, 1900. The management is well pleased, and it is said that orders have been booked for work for nearly all of the current year.

Commissioners from Los Angeles Presbytery Will Start for Philadelphia Tomorrow to Attend General Assembly. Dr. Hugh K. Walker, D.D., and W.

E. McVay will leave tomorrow morn-ing for Philadelphia, to attend the General Assembly of the Presbyterian Church. They are charged with the Church. They are charged with the special mission of securing to Los Angeles next year's sersion of the general body. The only competitor in the lists against this city is New York, and while the odds are strongly against us, Dr. Walker and his colleagues are armed with a mighty desire for success, and it is hoped they may be able to cafch the plum. They have been preceded to Philadelphia by Rev. Mr. Stevens, another of the commissioners representing Los Angeles Presbytery.

The priory will have 100 feet frontage on Sichel street, and will be an
imposing building. All departments of
the work of this order will be expanded. At present there are ten Dominican Sisters in the home, and this
number will be largely increased. The
Sacred Heart School has an attendance
of 260 pupils. The nucleus of a good library—some 300 volumes—has just been
received, the gift of Montgomery Council, Y.M.I., and of Father McAuliffe.
The Dominican Sisters entertained
about one hundred children, pupils of
the Sacred Heart School, with an arbor picnic Friday afternoon. Refreshments were served in abundance, and
a general holiday enjoyed.

LIVELY REAL ESTATE.

During the past month there has been unparalleled activity in real estate and building circles in the southwestern part of the city. The real estate men report more sales than in any previous month, and business appears to be on the increase rather than on the decline, as expected at this time of the year. Within sight of the college there are at least thirty houses in process of construction, and ground is broken for several more.

It is 'almost impossible to find rentable property, for the houses are either built by the owners for their own use, or are leased as soon as completed. The proposed Jefferson-street railway has been a factor in creating this activity. J. H. Hodges of Thirty-ninth street has invented a hay press which is proving successful. The press weighs

RECENT MUNICIPAL ELECTIONS.
The Review of Reviews for May contains a comprehensive article on the subject of recent municipal elecions-more particularly those held in various cities of the United States during the month of April. The fact is noted as most important that in almost every case these elections turned upon issues of a strictly local and municipal character. "The particular questions that were involved," oberves the Review of Reviews, "are indeed of real significance and monortance; but, perhaps, of even more conequence is the discovery that local ublic opinion in this country can low be focused upon local affairs. It is not số many years since party prejudices could be successfully played upon to keep our municipalities from making municipal issues foremost in the selection of mayors and boards of al-

These results are an auspicious augury. They that the power of the political boss and of political rings, in the government of our cities, may be broken. The Review of Reviews says:

"In our municipal government at present there is a great and wholesome struggle toward a higher and better order of things. This vigorous move ment takes many different forms, four or five of which may be noted especially. The first of these, and in some ways the most important, is the gen-eral movement toward better princi-ples and methods in the technical or-ganization of a municipal government. A little inquiry shows that municipal reform in the United States is proceeding upon the whole very hope-fully; and it is truly remarkable how rapid of late has been the growth of the sentiment in favor of non-pa; "isanthe sentiment in favor or uon-pa; "san-ship in municipal elections and ap-pointments. Many men who only four or five years ago were strict Republicans or Democrats even in local elections, are now avowedly with the independvolved. Thus, it was the independent vote that turned the scale in Chicago and elected Carter Harrison again, although if the Republicans had nomby virtue of non-partisan support."

Loving Christ.

R EV. J. S. THOMSON, pastor of the Independent Church of Christ, in the Simsson Auditorium yesterday preached on "The Meaning of Loving Christ."

"Some persons say: 'We cannot love one whom we never saw, whom we never heard, whom we never touched.' Christ's answer to these persons is found in the following words: 'If you love me, you will keep my commandments, and keepeth them, he it is that loveth me;' 'If you keep my commandments, and keepeth them, he it is that loveth me;' 'If you keep my commandments, ou will abide in my love.' When we obey the words of our divine Master. He comes into our hearts as our best friend, and He becomes to us in spiritual ways our inspiration, our joy, and our comfort, and our love for Him becomes pure, spiritual, moral and exalted. Obedience prepares us to commanne with Him, and communion with Him leads to appreciation and consecration. We posses His love, and He possesses our love. We learn to know H'm spiritually, 'Blessed are they who have not seen and yet have believed.' And Paul's statement is: 'Even though we have known Christ after the fiesh, yet now we know Him so no more.' Our love for Christ cap be proved by our obedience to His commands; and here are a few of His commands; and here are a few of His commands; and here are a few of His commands; Believe in me;' 'feed my lambs and tend my sheep;' 'go into all the world, and preach the gospel to every creature; 'love one another as I have loved you: 'take up the cross and tollow me;' 'seaich the scriptures;' 'suffer little children to come unto me, and forbid them no: 'Christ is the Christian religion and the Christian church. Without Him we can conothing. He is our hope an I inspiration. No church can endure that minimizes Christ, or that refuses to magnify His divine gospel. Our highest duty to the present and the future is to give the young a profound education in Christ's doctrines so that He will be in them the hope of eternal life and glory."

The Everlasting Arms.

The Everlasting Arms. The Everlasting Arms.

A the First Christian Church yes—
terday morning, Rev. A. C. Smither—
preached upon "The Everlasting
Arms," from the text, "The eternal Gouis thy dwelling place and underneath
are the everlasting arms." He said:
"These are among the very last
words of Moses, and have a solemn
significance indicating his supreme confidence in God after years of trust in
Him and service for Him. These words
of 3009 years ago are worthy of the
ripest Christian faith. In the use of
the word arms have the ancient lawripest Christian faith. In the use of the word arms hare the ancient law-giver recognized the existence of a personal God and of His personal relation to His followers, and a personal care over them. There is no more marvelous and comforting truth in all the word of God than this. The eternal God is pledged to the welfare of His children, and opens up the floodgates of infinite blessings and pours them upon His trusting children.

"These words stand for the nourizhing, cherishing presence of God. As a mother cherisheth in her arms the child of her own bosom, so God careth

child of her own bosom, so God careth for those who put their trust in Him and follow after Him. Not a sparrow

were formed, and the earth fashioned for a dwelling place for man. By His power the stellar systems move in space in matchiess harmony and beauty. By Him is directed every lorce of the universe, physical, moral and spiritual. Those arms have routed the forces of evil in the past. They are piedged to the protection of the Christian today. Before Him will be routed the symmet of sin and wrong. Bereated Goth and the children of God will rise from their graves to walk forever more in the divine presence. What a comport are these marvelous truths to the one fighting against the strongholds of sins, the mighty forces of cvil. What an incentive they offer to the indifferent to come out of the valley of infactision and enlist in the active service of the Christ."

The Shadows We Cast.

A T Christ Episcopal Church yester-day morning. Rev. Dr. George Thomas Dowling used as his test the statement that "They brought forth the sick into the streets and laid them where Peter's shadow might fall

the statement that "They brought forth the sick into the streets and laid them where Peter's shadow might fail upon them." He said:

"We are not told that his shadow healed them, though perhaps it did, for we are even now learning only the A B C of the power of occu't forces; but whether it did or not does not matter. The central fact is that they c'd not keep away from him. If it did not heal their bodies, it helped their hearts to feel that his shadow rell upon them. It is a well-nigh universal desire. The whole world is longing to place itself within the shadow of some one whom it believes to be strong and good.

"Now, if, like Peter, we are Christ's disciples, every one of us may cast these healing shadows. But how? In the first place, we cannot cast the shadow unless we have the substance Character cannot be counterfeited for any length of time. If we are not real, we shall surely be found out. It is an encouraging fact that no man ever succeeds permanently in the ministry, however brilliant be may be, unless people feel deep down in their hearts that he is a good man. And if you have the substance, you need not worry about the uselessness of your lives. You will have a shadow and God can use that, Peter never thought about. They are our unconscious ministries—our shadows.

"And then, again, we cannot cast he bealing shadow unless we ourselves stand in the sunlight. On that awful with in Gethsemane, when Peter, who were about him. But where is the difference? Feter has come into the light. Now he is standing where the rays of the Sun of Righteousness can rall upon him. And so his shadow cannot help falling upon others.

"I would send you home with this closing thought: Toward evening lime our shadows ought to grow longer. Brethren, what is the use of life with all its experiences, if it does

filled. 'At evening time it shall be light.'"

Dr. Jones.

REV. C. J. K. JONES preached yesterday morning in the Church of the Unity on "Life on the Earth." He said, in part:

"Paul in one of his depressed and anxious moods wrote to his little band of followers in the very wicked city of Corinth, 'If in this life only we have hoped in Christ, we are of all men most pitiable.' We are not surprised at his belief in another stage of existence as being necessary to compensate for the inequalities, the hardships, and the sorrows of this life, Paul's exceptionally severe experiences had the natural effect of causing him to think lightly of this world. Before condemning him we should remember his life as an apostle and missionary, and put ourselves in his place.' We also might feel as he did at times, and exclaim, 'O wretched man that I am who shall deliver me out of this body of death.' Misinterpretation of the real spirit of religion has led to a tendency, in all Christian doctrines, to lightly esteem the very real, and blessed life we lead on this wendrous enrth. We srraught from childhood, I was, that the only fact which redeems life here and makes it endurable is that the Christian may at last escape herefrom and inherit eternal life. Unquestionably there are many men and women who strenuously hold to this view, and who find in such a belief the courage and strength to go on with life until the end shall come.

"But is it true, as a matter of fact, that life in this earth is so altogether pitiable, for the normal men and women, as Paul and others in their pessimistic moods have picture 1 it? Is all the joy and pace and blessedness of life dependent upon the thought and fact of escaning herefrom some day? I think not! And I certainly think that there is no element of a rational religion which requires us to conclude that this life is so altogether evil. Such a conclusion seems to me to be a libel on the Creator who has ordained all things and belings. Religious and scientific persimism are all one. As a matter of

The Ever-burning Fire.

R EV. PHILIP JAMES WARD preached yesterday at the Central Baptist Church, corner of Flower and Pico streets, from Leviticus vi. 13: "The fire shall ever be burning upon the altar: it shall never go out."

Mr. Ward said, in part: "The altar of brass upon which all sacrifices were offered was a most important part of thousand things once deemed essential become obsolete, but those will ever be need to approach God through the merits of the slain lamb. Morning and evening fire was taken from this altar for the golden altar of incense, indicating that our praises to God must ever be offered through the merits of Christ's atoning blood. The text beautifully suggests that the fire of devoition in the heart of the Christian should never be allowed to die out. The fire of boly enthusiasm in the Christian's fire, On that (id Jewish altar the sacrifice was required to be doubled on rifice was required to be doubled on the Sabbath, suggesting to us that on the Sabbath our service for God should be richer and fuller than on any other

Power of the Tongue.

Rev. M. H. Plumb, at Centernial Methodist Episcopal Church. Weshington street, pleached yeterday morning from the text found in Frov. xviii, 21, "Death and life are in the rower of the tongrow". He said in Frov. xvili. 21, "Death and life are in the power of the tongue." He soli: "It appears to me that the wise man gave license to the tongue when he spoke there woulds. There are times to speak and times to keep stient. 'A word fitly spoken is like appears of gold-in pictures of silver.' In rearrance than one thousand languages spoten. The tongue represents thoughts, idea, plans—a way of expressing ourselves, in the ideas and thoughts expected there may be something the best and thoughts as the bit in the norse smouth. Then again be compared it to the helm of a ship and to fire. Those of you who have read of the terribe conflagration at Jacksonvice during the cposition to the fourth commandment, for the observance of the seventh day, is one of the indications of the tendency tywerd a union of the church and the state.

A circular sent out by the Christian Endeavor Union of California was read, in which strong efforts for the enforcement of the faise Sunday Sabbath were advocated. Absolute suspension of secular employment, as well as of really immoral practices tolerated by law on all other days of the week, appears to be the object of the union. A man who conscientiously believes he is right is under obligations to do what he can to make others believe as he does himself, so these people have a right to do what they can to persuade men to observe Sunday as the Sabbath, but they have no right to compel them to do so by legal enactment.

The law of California, in Elder Owen's opinion, stands exactly where it should. Those who observe Sunday as the Sabbath must be protected in one of the content of the sunday as the Sabbath must be protected in one of the content of th Then again be compares it to take helin of a ship and to fite. Those of you who have read of the terribe conflictation at the description of you who have read of the terribe conflictation at the last week have read semething of the power of fire. The tengue is a power we are called upon to control—as a servant to do our bidding. We hear of the languages of art, flowers and collings, and Gol has put upon them a newer; but these, with all their power, are not adequate to that of curaumanity. Speech of the highest of the languages of the highest of the highest of the character of the individua. The two extremes, good and bad, are in the hand of man. To which shall be lean! It appears to us that at this distance from God we should give Him the very best power the tengue possesses. "Pithagorus said, The wound of the sword. It is a mighty force for good eventually in the sword. It is a mighty force for good with its best use. How blessed it is that we may receive so many benefits from the power of language, and it is perfectly legitimate to recornize this power when in accord with the will of God. Abraham listened to the angels in his appeal for Sodom. Was language ever more important to Abraham or to a wicked city? Hard words are as hallstones in summer. Pleasant words are the power that has lifted thousands out of their zorrow, and have been a bain to the troub'ed, cick, dying and bereaved. If this gospel never had any language, how much less would we have to lean upon in the great battle of life! You go to the bedeide of the sick and talk of the home where there is no oam, and your words bring joy to the individual, whose hones are waited to the glory world. This power of the tongue—how are we exercising it? Shall we say it is elevating an inspiring? Let us fully appreciate our great privilege and use our nowers to the honor and glory of God." owen's opinion, stands exactly where it should. Those who observe Sunday as the Sabbath must be protected in their conscientious religious weechip on that day, but the same protection must be given to those who observe the seventh day, the true Sabbath, or religious liberty is gone.

That the change from the seventh day Sabbath to the first day Sabbath is due to the machinations of the Catholic church is proved by the catechism of that church, which calls attention to the inconsistency of the Protestant sects in rejecting the authority of the church and still observing the day that it claims the right to have changed from the written law of God. A Catholic lady once asked Elder Owen to show her from the Bible any authority for keeping Sunday as the Sabbath. He surprised her by saying he did not keep Sunday, but the seventh day instead, and she admitted that as a Protestant he stood on proper ground. If rrotestants are going to keep Sunday. Catholics may well inquire why they do not come over and observe all the other traditions of that church.

Ultimate ensetment of laws against those who keep other than the first day of the week was shown to have been clearly prophesied in Revelation, where it indicates that such will be debarred from buying and selling, and eventually will be put to death, for their refusal to observe Sunday as the Sabbath, in opposition to their own consciences and the plain word of God.

The revelator, however, after outlining the period of persecution that is to result so disastrously to the true followers of God, turns to the "hundred and forty-four thousand," harps in their hands, who will sing a song that the groat company redeemed from the earth cannot learn. These, in the estimation of the speaker, will be those who keep other than the first in their hands, who will sing a song that the groat company redeemed from the earth cannot learn. These, in the estimation of the speaker, will be those who keep circity the commandments

These, in the esti-mation of the speaker, will be those who keep strictly the commandments of God, which alone includes recogni-tion of His creative power, and of the "rest" that was sanctified in the Sab-bath of the seventh day. Those who observe that day can sing a song that no others can learn. These have the "seal of the living

basing his remarks upon Psalm cxxii. In the course of his sermon he said:
"Jerusalem has had the most remarkable history of any city in the world. Both God and man regard it as taking first place. It is rich in analogies for the theme of the hour. What Jerusalem was to the Jews, that this place is to us. It was the place of the house called by the divine name. There in the first place was the ark of the teatimony on Mt. Zion; then came Solomon's Temple on Mt. Morlah; after that Zerubbabel's and after that Herod's. They were built for the most sacred of purposes, and this house we have dedicated to the Lord. Concerning this auditorium more can be said of it than of the majority of church auditoriums today, for it is never used for secular meetings, or work dishonoring the high purpose for which it was built. Incongruous associations are not suggested to those who are accustomed to sit in these pews.

"The Jews esteemed Jerusalem as the seat of worship, for thither the tribes went up, the tribes of the Lord, unto the testimony of Israel, to give thanks unto the name of the Lord, and this building is the place of our united praise. Here as a people we adore and give thanks, and you know that I speak not a meaningless word when I say that this is the house of God. Has He not here recorded His name? Has He not here recorded His name? Has He not here worship, and have you not exclaimed again and again, 'Verily this is none other than the house of God, and this is the gate of heaven. Your God and here your heaven you find?

"The name of Jerusalem signifies the abode of peace. It was therefore a play upon the name itself when David prayed for peace to be within her walls. I am gratified to be able to record of this house that it is a Jerusalem for signification. Very few are the times when we do not breathe the air of peace. The Lord is very good to us in this—our members love peace. We have the joy of dwelling upon the exalted heights of a celestial tranquility. This spiritual city is set on a hill, and its name is Ph

and of a continent, just to know them. And you Christians who remain outride of this church ought to come in, for you are missing half of life in not
knowing these fellowships.

"I speak what I know is the experlence of many when I say that this
house has been the house of peace.
Troubled and burdened hearts have
come here and they have found rest.
Their burders have vanished. Their
sorrows have been soothed. The languishing have found an Elim after
every Marah. The sinner, too, has had
a blessing. He has discovered the
fountain open far sin and uncleanners.
He has seen here Jesus crucified for
him and has lost his sins in the blood
of the Lamb. Here also he has received
the consolation of a love divine. Oh,
beautiful has this Zion been to multitudes of sufferers! Truly God is known
in her palances for a refuge.

"The Hill of Zion yields
A thousand sacred sweets,
Before we reach the heavenly fields,
Or walk the golden streets."

Studies in Revelation. LIDER R. S. OWEN again last evening gave a lecture on "Revelation" at the Seventh Day Adventist meeting-house in Carr street, just west of South Main street. Sunday evening had resched the fourteenth chapter of Revelation, the first five verses of which were read by the speaker.

A few points were considered in the thirteenth chapter, which was the subject of comment last week. The union of the Catholic church with the civic power was shown to be the repidly-maturing union of the Protestant sects with the ruling pawers of state. Yielding obedience to civil laws, which are opposed to the law of God, is the "image" of that obedience formerly exacted by the Catholic church by recourse to oppressive measures, of the civil power.

to such legislation will worship God as they see ft, in split of carreion. They will, therefore, become 'ne victims of persecution, as in the days of Catholic intolerance. The 'dragon's voice,' now beginning to be heard in laws intended to enforce the observance of the false Sabbath. the first day of the week, in eposition to the fourth commandment, for the observance of the seventh day, is one of the indications of the tendency toward a union of the church and

You may look for all sorte of words from such a mouth but the trivial and vapid—words of treenest enjoyment of the beautiful, words that bits like scorpions, words that ring with the tense but never strident resonance of authority. The figure is rather under the normal, well-knit and strong of frame. Seen in some lights you would think the man foreign born, from the Latin half of Europe, so swarthy the tones of his face; but, again, and when he speaks or moves, particularly, he is no more the man of the south, but a conquering Saxon, born to rule.

It is an inadequate picture of one of the commanding figures of modern commercial life, James & Hill, president of the Great Northern Railroad, just now one of the leading members of a company of men, small in num-

We have the news spread through given Jennie Holmes a position as clerk in his store the gossips of that self-important little county seat were thrown into a fine flutter. The women shook their heads over their teacups and prophested that no good thing could come out of such an innovation. The men, encircling the stove in the store of Frank's only competitor in "Groceries, Dry Goods, Crockery and General Merchandise," decided that "ef ol' Sam Wilson knowed there was a gal swishin' her skirts roun' his flour barrels an' sugar sacks, he'd naturiy turn over in his grave." And the whole town and surrounding farming district announced that it was all due to Frank's Wilson's having attended a business college in the city for three months.

But in due time the women on "trading trips" gravitated toward Jennie. She had an eye for colors and knew just how much it would take for bady's first short dress, or Martha Jane's plinafores. The bluff farmers liked her, plant for the profit of the profit of the parties of the profit of

HOTEL CONTRACT TO BE LET.

The contract for the construction of the new Raymond Hotel will be let iomorrow to a contractor whose bid practically has been accepted, but whose name the builders are not yet free to divulge. The contract will not go to the lowest bidder, however, but will be one of the five Los Angeles firms which have submitted figures. The contractor who is to receive the award guarantees to have the new building resty for occupancy December 1 of this year, and will back his agreement with heavy bonds. The plan is to work two shifts of men on the building, one gang to go on duty at 4 o'clock in the morning and work until noon, when they will be relieved by a second squad, which will labor as late in the evening as possible. Should the exigencies of the case demand it, a third gang will carry on the work by electric light.

The foundation has been made ready for the superstructure; much lumber already is on the ground, and as soon as the contract shall have been let operations will begin.

Gen. Wentworth, who is to manage the hotel, leaves with Mrs. Wentworth Monday evening for the East, and will stop at Chicago and Grand Rapids to purchase furniture, carpets, linen and all the accessories of the big institution, all of which will be ready to place in the building upon its completion. The hotel will open January 1, 1902, for the accommodation of guests.

LA PINTORESCA TO CLOSE.

La Pintoresca Hotel, after an unusually successful run, will close on the 10th inst., possibly a few days earlier, only a few of its patrons remaining. Gen. Wentworth, who has conducted the hotel for several seasons, relinquishes its management with the close of the season, and hereafter will be identified with the new Raymond. It is likely that La.Pintoresca will be conducted next season by its owner, M. D. Painter. Chief Clerk A. F. Meserve will leave with his family about the 15th inst., for Jackson, N. H., where he will continue in the employment of Gen. Wentworth at his summer resort, Wentworth Hall. Almost the entire force which has been employed at La Pintoresca during the past season also will go to Jackson, among them being. Miss Scofield, clerk; Lewis Tuttle, head walter, and Alexis Bordet, chef.

SCHOOL CENSUS COMPLETED.

POMONA, May 5.—[From The Times' Resident Correspondent.] School Census Marshal C. W. Talbott has just finished the annual canvass and filed his report with the Board of Education. According to the enumeration, there are 1580 children of school age. Of these 770 are boys and 730 girls last year. The report further shows that there are altogether 2046 children under 17 years of age against 1905 lar; year. Figuring the population of the city from school statistics, using 3.86 as the ratio between the children of school age and the total, Mr. Talbot estimates the population of Pomona at 6110, which is probably nearly correct.

The Universalist Convention, which h: been in session here for three days, will practically close this evening, although there will be some small matters of business to transact tomorrow morning. The attendance has been good, and much interest has been manifested in the programmes. This forenoon the service was held in the auditorium of the Unitarian Church, Rev. F. T. Scott, the local Universalist pastor, delivering the seemon. At the meeting this evening, Rev. J. S. Thomson of the Independent Church of Christ of Los Angeles, is to be the principal speaker.

Nothing has been heard of the whereabouts of Arthur Pechner, the talkative and debonalr barber, who left town and a number of mourning creditors, during the past week. Pechnerborrowed money right and left from easy people here. A while ago he joined the local military company, and, being a good tonsorial artist, secured a large share of the company boys trade at his shop opposite the Armory. It now transpires that he used a number of the Doys very shabbily, and in view of this treatment, several company members last evening stuffed a uniform with curled hair, labeled the figure "Pechner," and hung it in front of the Armory.

Ruddock, Trench & Co. shipped three carloads of oranges from their packing-house here yesterday.

The total amount of rainfall here for the season is now 21.34 inches.

LONG BEACH.

TWO MEN HURT. LONG BEACH, May 5.—[From The LONG BEACH, May 5.—[From The Times' Resident Correspondent.] Joseph H. Huff, a section hand employed on the Terminal, received painful injuries at Bixby, north of Long Beach, Saturday. He had coupled a caboose to a string of gravel cars which were backing down the grade, when the coupling-pin broke. A large piece of the pin flew and struck a glancing blow on his chin and the right side of his face. His chin was cut to the bone in ugly fashion, two teeth were knocked out and he was otherwise disfigured. The wound was dressed by Dr. Wood, the company's surgeon.

B. Berning, while operating a clamshell crusher at Asbury, west of town, Saturday, had his right hand caught in the machinery. The forefinger was mangled below the outer joint and two other fingers were lacerated. In the terrible struggle to withdraw the hand, Mr. Berning wrenched his arm so severely that he will be disabled for a month or two. He was attended by Dr. Wood.

Harry S. Knight, who ran a large plece of board through one of his legs while attempting to break a broncho on the Bixby ranch a month ago, has so far recovered that he will have charge of the cowboy tournament in Flesta Park in Los Angeles next Thursday.

SAN PEDRO.

TO HAVE STATE LABORATORY.

SAN PEDRO, May 5.—[From The Times' Resident Correspondent.] The State University is about to establish a biological laboratory here. The laboratory will be located near the site of the East San Pedro bathhouse, and will be fitted with tables, tanks, an engine for pumping water from the ocean into the tanks, and other equipment. The big launch Elsie, a very engine for pumping water from the ocean into the tanks, and other equipment. The big launch Eisle, a very seaworthy craft for one of her size, has been chartered for the sea work, which will include dredging for specimens and other operations.

The laboratory is to be maintained for at least a year, and will be in charge of a number of university students soon after commencement. Records of ocean temperatures and other data in the new study of oceanography will be kept. The operations will not be limited to the nighborhood of San Pedro, which is said to be one of the best localities on the Pacific Coast for the gathering of marine specimens, but will be extended to Catalina Island, and to other localities not too far away.

DITCH INCORPORATION.

RIVERA, May 4.—[From The Times' Resident Correspondent.] The Cate Ditch Company has incorporated, with James Barlow, president; F. A. Coffman, secretary; J. A. McGill, D. W. Cate and Thomas Mathews, directors. This company has just completed two miles of Portland cement ditch in this vicinity, at the cost of \$2000.

An ice cream social, given by the ladies of the W.C.T.U. at the parlors of the hotel in Rivera, was quite well attended. In spite of the pouring rain. Something over \$7 was cleared.

MISSIONARY CONVENTION.

COVINA, May 5.—(From The Times' Resident Corvespondent.) Yesterday afternoon's session of the Women's Foreign Missionary Convention for the San Diego district opened with a much-increased attendance. Mrs. Enyeart's address of welcome was responded to by a number of the visiting ladies. The devotional exercises were read by Rev. Mr. Leach of Glendora. Reports were read from the Young Women's societies of the various points in the district, followed by a vocal solo by Miss Ruth Stanley of Covina. Mrs. O'Neal of Pasadena gave an excellent talk on "The New Venture." Miss Munson of Des Moines rendered a pleasing recitation. Addresses were made by Rev. Leach of Glendora, Rev. AZUSA, May 4.—[From The Times' Resident Correspondent.] The regular meeting of the Azusa Woman's Club was held Friday afternoon. The principal paper was presented by Mrs. F. H. Fabrick, on the subject, "Village Improvement Societies." This called out considerable discussion, the application of the village improvement idea to Azusa affairs being thoroughly talked over. Mrs. P. C. Danleis had charge of the current topics division, and gave a review of recent events in Washington, the proceedings in the British Parliament, the war in China and other items of interest. Plans were made, and committees appointed to arrange for an open meeting next month.

rences at the Police Station that to an outsider would be simply staggering. But yesterday afternoon the desk clerk and several other officers at the station fell over themselves when a young man walked in and politely asked for hot water with which to flush his pleural cavity.

Harry Taylor of Santa Ana was the visitor. He is neither insane nor was he intoxicated, as was at first believed. He didn't care for the services of a physician, he said, but merely wished to utilize the Receiving Hospital a few minutes.

Once inside the hospital, Taylor gave the policemen and trustles an exhibition they will long remember. Taylor is one of seven men, it is said, who in the history of medical practice of the world has lived after undergoing an operation for the removal of a whole lung. That member is missing from his right hide, and in its place there is a yawning void.

In the hospital he produced a long rubber tube with a 6 or 7-inch long, curved silver nozale. This he attached to a 2-quart hot water bag, and then he commenced to undress. Just above his waist, on his right side, is a vulcanized-rubber tube which marks the center of a large scar. Through this tube he inserted the sliver nozale, and then turned on the water, which contained a disinfectant. After turning the nozale around several times, so as to spray all sides of the pleural cavity, it was withdrawn. Then Taylor coughed, and there spurted from his side a fountain of warm water. Once more he coughed, and this time there issued a stream from his mouth.

Taylor was once a sufferer from hydatid cysts. They afflicted his right lung. There were 210 of them, varying in size from half an inch to four inches in diameter. He underwent an operation of their removal, but others appeared. Then there was a second operation. This was three months ago, and at that time his lung was removed. The cavity is not entirely healed, and has to be treated in the manner described every day.

Taylor repeated the treatment for the benefit of the hospital physicians last evening. He left his apparatus at the hospital, and says he will call again today.

The man came here from Santa Ana yesterday. He is a peanut vender with a roaster, but has no stock nor money with which to buy it.

captain of Co. A, Thirty-fifth Volunteer Infantry, returned home yesterday after nearly two years absence, during which time he has seen hard military service in the Philippines. Considering the fact that he was dangerously wounded and only a few days ago had the Filipino bullet extracted from his breast, he is in better health than his friends expected. He will not be able to be on the streets much, however, for several days, because the operation performed in the Presidio Hospital left him too weak to think about work for some time to come.

His experiences in the Philippines have not changed his appearance in the least, and he cordially greated the scores of friends who called upon him at his residence on Lincoin street yesterday. During the time that he was an officer in the Seventh Regiment, Capt. Schreiber was considered one of the best disciplinarians and tactitians in the State Guard and when the Seventh went into the service of the government his work was highly complimented by officers of the regular army stationed at the Presidio. When the volunteer regiments were enlisted to take the places of the State organization then in the Philippines, he was successful in securing a captain's commission and was assigned to the command of Co. A of the Thirty-fifth Regiment, and with that command he went to Manila and there saw much active service.

The wound, from the effects of which he is still suffering, was received in a hot skirmish with a large party of insurrectos, which a mixed detail from several companies were driving back. The bullet was a brass-jacketed Remington of 45 caliber. It entered his left breast over the heart, and, striking a rib, glanced around and did not enter the cavity. The wound healed and he continued his service, but it gave him almost continual pain, but it was not until he returned to this country that he had it extracted.

During the latter part of his service, Capt. Schreiber was in command of a battalion doing garrison duty in one of the southern districts and his
